3D Embossed WPC Decking

We've only recently introduced our solid decking in the last couple of years and have seen a terrific response to it. We sell only solid core decking as we believe this is by far the best quality to be used in extreme weather conditions. Applies to hot or cold countries. All our decking comes in a reversible form which allows you to choose which design you'd prefer.

SPECIFICATION: 2200MM X 140MM X 20MM.
